

PETITION FOR A SAFE RENEWABLE WIND ORDINANCE IN THE TOWN OF CLAYTON

We, the undersigned, believe a renewable energy plan must not endanger our four most important non-renewables: our families, our homes, our community, our land.

For reasons of health and safety associated with noise, shadow flicker, and other concerns, that industrial wind turbines up to 500 ft tall should not be built any closer than 2600 feet from residents property line and the turbine noise level not exceed a reading of an increase of 5 dBA established at the residents property line. We agree and ask the town of Clayton to adopt an ordinance that provides this safe setback and noise level for the protection of all residents of our township.

We believe any renewable energy plan must preserve the health and safety of all members of our community. We ask that the Town of Clayton adopt these changes to the Town's wind ordinance immediately.
